

SIDEWALL PANEL LAMINATION

What interior panel refurbishment services do we offer?

- Complete refurbishment of sidewalls, ceiling panels, overhead bin doors and monuments.
- We remove existing laminate; we do not laminate over existing – this avoids substantial additional weight to the panels and enables repairs (if necessary) to the composite structure.
- From shipsets to single panels - prices available on application.
- Fast turnaround from our Letchworth workshop.
- Fully trained, certificated and professional cabin technicians carry out the lamination

Additional costing

Small Area

\$477.00

per panel

Medium Area

\$777.00

per panel

Large Area

\$977.00

per panel

Laminate can be customer supplied or charged accordingly depending on the required specification.

Bostik-7132R Glue will be charged at \$450.00 per tin, we estimate that three tins are required for fifty sidewall panel.

Should spares be required for the sidewall panel, i.e. plastic trimming parts, these will be charged depending on the PN required.

Standard Price and TATs

B737 Sidewall Panel Refurbishment - \$625.00 to \$865.00 each

- Inspection in accordance with CMM
- Remove one sheet of laminate
- Preparation for lamination (not including composite repair)
- Apply on sheet of new laminate
- Release of certificate

Standard TAT's

- Our standard TAT on a shipset of sidewall will be 21-28 working days from the point of approval and payment.
- We are able to offer an AOG service to reduce our lead time to 7-10 working days for a shipset of sidewall panel, the additional charge of AOG service will be \$150.00 per sidewall panel.

About us

Cabinair Services offers many specialised solution for aircraft interiors, one of our specialities is the refurbishment of sidewall panels, including their re-lamination. With EASA Part 145, FAR Part 145 and TCCA CAR 573, this requirement will be well within the capability of our technicians and the company's approval to release with the required certification
